Co-Op Job Description:

The ATS co-op program is set up on an incentive basis. A rate of $12/hr shall be paid (plus OT as applicable), as well as upon returning for a subsequent semester, ATS will pay up to 100% of the student's tuition & books for the previous semester. It is the goal of ATS to be involved in the co-op program with the intent to hire the student as a full-time engineer upon graduation.

ATS is looking for ME and MET students to provide services in the areas listed below.

• NDT technician assistant:	assist in industrial site inspections on a daily basis	**(travel req'd)**
• Engineering analysis:	assemble reports for tanks and pressure vessels	
• CAD	assist in any CAD (AutoCad) work required for drawings	
• Vessel inspections:	assist in industrial tank and pressure vessel inspections	**(travel req'd)**
• Building inspections:	assist in facade maintenance anchorage inspections	**(travel req'd)**
• Computer Skills Required:	M/S Windows, M/S Office, AutoCad, (proficiency in M/S Excel is a plus)	

Full Time Job Description:

ATS is currently seeking entry level engineering positions for BSMET and BSME graduates. We are looking for engineers to provide services in both industrial and commercial inspections. This work involves site inspections, evaluations per codes and standards compliance, FEA modeling, ACAD, report writing, client relations, and travel of 30% - 50%.

- Industrial Inspections: Perform inspections of tanks, piping, and pressure vessels located at industrial facilities (paper mills, power plants, chemical plants, etc.).
- Commercial Inspections: Perform inspections and load testing of façade access (window washing) anchor points located on building rooftops.
