

INGENCO
Collegiate Summer Interns
Richmond, VA

INGENCO is a Richmond-based leader in the rapidly growing field of distributed electricity generation. We have a nationwide reach and are the largest producer of **renewable energy** in Virginia. We currently have three summer internship opportunities in Richmond, VA.

We are seeking one **entry-level Maintenance Helper** summer intern. The successful candidate will perform mechanical work on electrical power generating equipment, including preventative and minor corrective maintenance on production engines, gas blowers, and associated equipment. Will also assist Diesel Mechanics in cleaning, overhauling, and replacing engines, pumps, and associated equipment. Must be highly motivated and require minimal supervision. Must also have valid driver's license.

We are also seeking two **entry-level Plant Operator** summer interns. The successful candidates will perform operational work in our power generation plants. Responsibilities include startup and operation of our diesel-powered generation plant, maintenance of equipment and facility, regulatory compliance, and record keeping. Must be highly motivated and require minimal supervision. Must also have valid driver's license.

Please send, fax, or email resume in confidence to:
