

Engineering Internships

Royal Mouldings, a division of Georgia Gulf Corporation, is currently seeking candidates for engineering internship positions at its manufacturing sites in Marion, VA and Bristol, TN. Royal Mouldings is the leading North American manufacturer of vinyl-based building and home improvement products including, but not limited to mouldings and custom window profiles.

Description of Projects:

The internship program is designed to provide students with an in-depth, hands-on learning experience while working on challenging projects and networking with professionals.

Manufacturing Intern

The internship program is designed for students to learn the extrusion process and then apply this knowledge and solve problems related to mechanical development, new processes and equipment design, process optimization, and process improvement and refinement. Specific projects will include providing technical assistance in developing an automated off bearing process of PVC profiles from extrusion lines. Other tasks include stream lining the raw material requisitioning process and developing a plan to reduce total raw material inventory.

Product Development Intern

The intern will work alongside the Product Development team and will be responsible for the creation of drawings and manuals using AutoCad for the introduction of new products. (AutoCad experience required and knowledge of strength of materials preferred).

Requirements:

Candidates must be enrolled as a full-time student in an undergraduate engineering degree, preferably mechanical or industrial engineering program and be a rising junior or senior. The best-matched candidates will possess strong problem solving skills with analytical, logical, and comprehensive thinking. Strong interpersonal and communication skills are also required. All candidates for intern positions must be legally authorized to work in the United States without restriction.

Royal Mouldings offers a competitive salary and a great opportunity to grow by integrating classroom theory with practical work.

Start date: May 2008
