

**Boiler Thermal Services, LLC.
Midlothian, VA**

I am Nathan Russell, an ME from Penn State. I graduated just last spring and am working on the west side of Richmond. We are looking for at least three more new engineers this year. They will most likely be project managers like me, but for a different branch of our company. I work for our thermal spray division (BTS), they will be working either for our weld overlay company (iCLAD), one of our mechanical welding companies (SRI, plus new branches to come), or for NoNOx which makes screens for catalytic converters in industry, that are protected by thermal spray. These positions require hands-on abilities and the willingness to travel. Since I have been with the company, I have traveled to Asia 5 times. We also work all over the US.

If you have any interested students graduating this year, please let me know and/or have them send me their resume. Due to recent email problems, I ask that they CC me at ndr118@psu.edu.

Thank you,

Nathan Russell
